Science College,Beed.

Anjuman Ishat-e-Taleem Beed
Milliya Arts, Science & Management Science College, Beed.

Department of English

Context:

Since our students are mostly from vernacular media, they are very weak at English. They often find it difficult to learn.

Majority of the students are below average in terms of communication in English. Hence the faculties of the dept. arrange the remedial classes for the slow learners.

Criteria of distinguishing the slow and advance learners:

- ✓ In the beginning of the academic year, the test based on the basic knowledge of English is arranged.
- ✓ The questions are based on the basic knowledge of English.
- ✓ On the basis of the marks secured by the students, a distinction is made between slow learners and advance learners.
- ✓ The students who secure below 40% marks are treated as the slow learners.

Remedial Measures:

- ✓ The faculties try to teach English to the slow learners by using simpler methods.
- ✓ Remedial measures are implemented to improve their grammar and communicative skills: translation method, multi-lingual teaching.
- ✓ Efforts are also taken to improve their speaking, reading and writing skills.

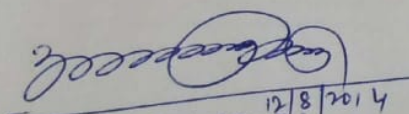

Objectives:

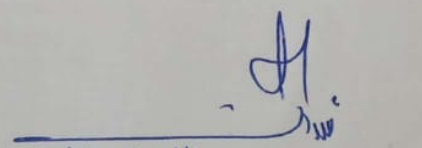

- ✓ To improve English grammar of the students.
- ✓ To improve communication skills of the students.
- ✓ To improve different skills of the students: Speaking, Writing, Reading.
- ✓ To make the slow learners capable of keeping pace with the advanced learners.

Course Content:

- ✓ Parts of Speech.
- ✓ Tenses and their uses.
- ✓ Different types of verbs and their uses.
- ✓ Kinds of Sentences.
- ✓ Articles.
- ✓ Prepositions.

The remedial classes are arranged generally on **Saturdays at 10:12 to 11:00**
am

**Milliya Arts Science & Management Science College
Beed**

**Department of Chemistry
Syllabus for Remedial Class**

Organic Chemistry:

07 Hours

Branches of chemistry, Chemistry of carbon compounds, Classification of organic compounds, Homologous series, Empirical formula & Molecular formula. Structural Formulae, Isomerism, Common & IUPAC Nomenclature with reference to saturated & unsaturated hydrocarbon i. e. (Alkane, Alkene, Alkyne) Different functional groups. Some important preparation methods, physical properties & chemical reactions of Alkane, Alkene, & Alkyne. Aromatic compounds. Difference between aliphatic & aromatic compounds. Structural & electronic structure of benzene. Nomenclature of benzene. Nitration, Sulphonation, & Halogenation of benzene.

Physical Chemistry:

06 Hours

Some basic concept of chemistry – Atomic weight, Molecular weight, Equivalent weight, Avogadro's number, Mole concept, Normality, Molarity, Density & Vapour density. State of matter- Gaseous state, Boyles law, Charles Law, Absolute temperature & their Conversion. Ideal gas equation, Properties of liquid. Surface tension, viscosity. Chemical Equilibrium – Reversible & Irreversible reaction, exothermic & endothermic reaction, Rate of chemical reaction, law of mass action. Equilibrium constant.

Inorganic Chemistry:

07 Hours

Atomic Structure: Modern concept of structure of atom, Concept of shells, subshells, & orbital, Quantum numbers, Aufbau principle, Pauli's exclusion principle, Hund's rule for maximum multiplicity.
Periodic Table: Modern periodic table, Classification of elements, General characteristics of s, p, d, f, - block elements. Diagonal relationship. Periodic Trends like valency, Atomic size, Ionic size, oxidation number, Electronegativity, Ionisation Potential, electron affinity.
Chemical Bonding: Types of chemical bond. co-valent bond, Ionic bond, coordinate bond. Valence bond theory, Concept of hybridization, Types of hybridization & geometry of molecules (SP³, SP² & SP hybridization with suitable example)
