

Introduction

Gender equality is when people of all genders have equal rights, responsibilities and opportunities. Women make up 47% of the total world population, but they are still a long way from equality, even though the gap has reduced in recent years, for many women, equality is still just a word that doesn't apply to them despite laws being passed regarding women's rights. There is a huge gap in equality in between men & women for similar roles.

Keeping in mind the importance of gender equality the Gender Sensitization Cell & ICC of the college has taken an initiative to organize an international conference on the title "Gender equality today for a sustainable tomorrow".
